preconnect hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

Origin	Source
https://fonts.googleapis.com/	head > link `<link rel="preconnect" href="https://fonts.googleapis.com">`
https://fonts.gstatic.com/	head > link `<link rel="preconnect" href="https://fonts.gstatic.com" crossorigin="">`

Preconnect candidates

Add preconnect hints to your most important origins, but try to use no more than 4.
